

# BRI®: Connect. Collect. Compete.

*A Web-based, third-party rebate management program designed to improve efficiencies and increase profitability for builders.*

BRI is an easy-to-use, no-cost rebate management program that allows you to identify and collect 100% of your rebates by choosing BRI's participating supply chain partners' products.

## Maximize your rebate potential.

Offering the power of volume purchasing, HomeSphere seeks out and secures attractive cash incentives that many builders cannot establish independently. By choosing our BRI supply chain partners' products, you can maximize your rebate potential by identifying and ultimately collecting 100% of your rebates. While you get access to and incentives for using some of the best national and international brands, we serve as one point of contact to convert all incentives into one easily-collectable check.

*More than 70 leading brands and over 1,100 builders already participate in the BRI program.*

## Here's how it works:

**CONNECT** ... to and select from over 70 preferred BRI supply chain partners' products you want to use. When you do, you'll earn rebate points while continuing to negotiate prices and purchase your favorite products through normal distribution channels.

**CLOSE & TRACK** ... homes by community, lot and block efficiently and accurately with your BRI Web-based tool.

**COLLECT** ... one rebate check directly from us. When a house closes, your points convert to dollars. Each month, we'll send you one rebate check based on the points you've earned—all products are bundled together!

## Here's what's in it for you:

- ▶ Get 100% of your rebates—and discover new ones you didn't even know existed.
- ▶ Track rebates, sales income and manufacturer info with BRI's simple website.
- ▶ Use one point of contact to manage every manufacturer and rebate—get one check!
- ▶ Learn about top manufacturers and products including exclusive deals for BRI members.
- ▶ Continue to grow rebates by working with more BRI supply chain partners.
- ▶ Forecast and budget for future rebates through simple Web-based technology.

*As the premier provider of technology-leveraged supply chain services to the homebuilding industry, HomeSphere is the only company with national reach that uses Web-based technology to deliver a suite of supply chain services to help builders compete more effectively in the marketplace.*
