HOMESPHERE COMMITS TO THE DENVER COMMUNITY
*Lakewood-Based Company to Renovate a Home in Partnership With Rebuilding
Together Metro Denver*

(Lakewood, Colo. – Sept. 6, 2006) HomeSphere, a technology-leveraged service provider to residential homebuilders, has announced its participation with Rebuilding Together Metro Denver.

HomeSphere is committed to being a better neighbor and has chosen to positively contribute to the communities in which its employees and customers live work and play. Under that commitment, the company will sponsor a home renovation in the fall, scheduled for Saturday, Oct. 21. Employee volunteers, their spouses, families and friends will come together to paint, repair windows and plumbing, install appliances and more at a home in Denver, fulfilling Rebuilding Together's mission of helping homeowners age in warm, safe and dry homes.

Founded in 1999, the program works in partnership with the community to rehabilitate the homes of the low-income, particularly elderly and disabled homeowners so that they may continue to live in their homes comfortably and independently. Locally, Rebuilding Together has rehabilitated 165 homes and seven nonprofit facilities in just five years with the help of more than 3,500 skilled and unskilled volunteers.

About HomeSphere

Since the company's inception in 1999, HomeSphere has demonstrated and proven time and time again that builders, manufacturers and distributors derive the most benefit when they have business intelligence they can use. To help meet that expectation, HomeSphere offers technology-leveraged services to help builders, manufacturers and distributors better manager their businesses and optimize supply chain efficiencies. Lakewood, Colo.-based HomeSphere has a national network of experienced sales representatives, as well as customer support teams who are attuned to the needs of its builder, manufacturer and distributor clients.
